Housing is a critical component to any community being successful and livable. Our community is currently in the midst of a housing shortage. How should we as a community address this shortage?

Beyond supply, there are other issues related to housing that should be addressed.

Over the past few years, the cost of renting or owning a home has become unaffordable for many residents. How should housing affordability be addressed?

What style of housing (single-family detached homes, attached homes like townhouses, or multifamily complexes) do residents want to see built into the future?

How should we address the existing supply of homes in our community that are in a state of disrepair?

How should we as a community support the homeless population?
