

Livability relates to the factors that create a high quality of life for a community's residents including but not limited to buildings; natural spaces; economic prosperity; social stability; educational and training opportunities; health and wellness; and cultural, entertainment, and recreation amenities.

Each resident will have a different idea of what elements contribute to a having a high quality of life.

How do we ensure that our community is preserving, enhancing, and providing these elements to allow residents to experience a high quality of life?
