

**Resiliency** is defined as the ability to recover from or adjust easily to adversity or change.

This can refer to economic, social, or environmental changes. Over the last decade, our community has experienced all three of these types of changes with businesses moving their headquarters outside of the community, social changes that have impacted the country, and the ever-present impacts of climate change. Not to mention, the COVID pandemic which has changed the way people work and view their outdoor spaces.

What policies should be put into place to make our community more resilient to such changes and events into the future?
